

Growth Campaign Summary

Build Your First AI Project in 60 Minutes — Get 500 Final-Year Engineering Students Registered in 7 Days with a Budget of Rs.2,000

Submitted by: Sathwik Reddy | B.Tech CSE 2027 | Round 1 Growth Challenge

500 Seats Target	Rs.2,000 Budget Cap	7 Days Campaign	4 Channels Only
------------------	---------------------	-----------------	-----------------

1. Who Is the Target Student?

Segment: Final-year CSE / ECE / IT / EEE students (batch 2025-26) at Tier-2 & Tier-3 engineering colleges — JNTU affiliates, Anna University, VTU, AKTU, and equivalent state-level universities across Andhra Pradesh, Telangana, Tamil Nadu, Karnataka, Maharashtra, and Uttar Pradesh.

Key anxiety: Placement season starts in 60-90 days. The student has 3+ tutorial certifications but zero live-deployed projects. Their resume still has 'Library Management System'. Recruiters filter that in 5 seconds. They desperately need a credible project proof that they can actually explain in a technical interview.

Registration triggers: (1) Peer or campus ambassador sharing the link — social proof from someone they trust beats any ad. (2) '60-minute BUILD + DEPLOY' promise feels achievable vs 40-hour video courses. (3) Free NxtWave certificate directly adds to placement records. (4) Beginner-friendly — no GPU math, no PyTorch prerequisites. (5) This Saturday urgency.

Key objections handled in landing page FAQ: 'Is it really free?' (yes, NxtWave sponsors it), 'Will I get a certificate?' (yes, on project submission), 'I don't know AI' (no prior AI knowledge needed, only basic Python or JS), 'What if I miss the live session?' (recording + code sent to WhatsApp).

2. Campaign Plan — 4 Channels, Ranked by ROI

Rank & Channel	What I Do	Why It Works	Expected Leads	Budget
#1 Campus Ambassador WhatsApp Drops	Recruit 25 final-year students as ambassadors (1-2 per college). Give each a unique UTM link and a 5-message WhatsApp template kit. They drop messages in 18 college batch groups.	Peer-sent messages have 5-8x higher open rates than brand ads. Zero friction — one tap to register from WhatsApp. Ambassadors are incentivised via leaderboard prize.	250 leads (18% CTR, 40% conv)	Rs.1,200 prize pool
#2 Viral Referral Loop	Every registrant gets an instant unique code. 3-friend milestone unlocks VIP rewards: GenAI prompt pack, GitHub starter repos, and 1-on-1 AI resume review.	Built directly into the registration engine — zero extra effort per student. Compounds organically. Estimated viral coefficient $k = 0.38$.	130 leads (30% CTR, 37% conv)	Rs.0 (built in-app)
#3 College Club + HOD Email	Email the CSI, ACM, and IEEE student chapters + placement coordinators at 20 colleges. Forward to official placement WhatsApp groups.	Official channel signals legitimacy. Placement cell endorsement increases trust 3x vs. cold brand outreach. Higher attendance conversion.	80 leads (20% CTR, 50% conv)	Rs.0 (free email)

#4 LinkedIn + Instagram Reel	Post 1 short-form reel (showing 60-sec app demo clip) + 3 carousel posts per week on placement anxiety. Boost only the best-performing post.	Organic reach via engineering hashtags. Boosts only the proven post — avoids wasting budget on untested creative. Captures SEO-aware students.	40 leads (8% CTR, 22% conv)	Rs.800 boost (1 post only)
------------------------------	--	--	-----------------------------	----------------------------

Why only 4 channels? Prioritisation is being judged, not volume of ideas. Each channel chosen has a distinct audience layer and compounds the others — ambassadors seed referrals, referrals fuel organic virality, club emails add credibility, and social extends reach to students not in existing groups.

3. Funnel Math — How 500 Registrations Add Up

All conversion rates below are stated estimates and assumptions, not guaranteed figures.

Channel	Reach [est]	CTR [est]	Clicks	Reg Rate [est]	Registrations
Campus Ambassadors	3,500 students	18%	630	40%	252
Viral Referral Loop	1,200 link views	30%	360	37%	133
Club + HOD Email	800 addresses	20%	160	50%	80
LinkedIn / Instagram	2,000 impressions	8%	160	22%	35
TOTAL	7,500 combined	—	1,310	—	500 GOAL MET

4. Budget Breakdown — Sums Exactly to Rs.2,000

Item	Amount	Justification
Top-3 Ambassador Prize Pool	Rs.1,200	Rs.600 + Rs.400 + Rs.200 vouchers. Incentivises high-effort ambassadors at colleges with largest student batches.
Referral Milestone Rewards (8 winner slots)	Rs.800	~Rs.100 per reward. Students who hit 3-friend milestone unlock VIP perks. Budget covers voucher / coupon delivery costs.
Design tools (Canva), hosting (Vercel), data (Supabase), email (Gmail)	Rs.0	All free tiers used intentionally. Budget preserved for direct student incentives — the highest-ROI allocation.
TOTAL	Rs.2,000	

5. Metrics, Risks & Day-3 Contingency

Key Metrics Tracked	Risks + Contingency Plan
---------------------	--------------------------

- Daily registration count vs 71/day target - Referral viral coefficient (k-factor, target: 0.4) - Channel attribution via UTM source tagging - Ambassador leaderboard rank per college - Form drop-off rate by field - WhatsApp link CTR per batch drop - Day-3 pace trigger for contingency activation	Risk 1: Day-3 pace below 150 regs Fix: Activate 5 backup ambassadors + countdown urgency drop Risk 2: Ambassador no-shows Fix: 2 pre-vetted backups per college in the pipeline Risk 3: Referral link fatigue in groups Fix: Rotate across 5 pre-built message templates every 48h Risk 4: LinkedIn reel underperforms Fix: Redirect Rs.800 to engineering nano-influencer (2k-10k followers)
